PERF-02 | Therapist only - all age groups

A useful standard versus a burdensome cost

1 | Purpose, fit and boundaries

Purpose of this unit

Map what a requirement allows and what it costs, and define a sufficient level in relation to the goal and conditions. The aim is not to abandon quality, but to choose where extra effort helps and where it displaces other needs.

Choice and adaptation

Choose this sheet following professional assessment and with consent. The person may skip questions, answer aloud, or choose another tool. This is proposed original material for review; it provides no score, diagnosis, or promise of an outcome.

Boundaries specific to this unit

Do not reduce safety, medical, legal or binding professional quality requirements. First clarify actual requirements; overload or lack of resources is not necessarily perfectionism.

Reusing existing material

PERF-01 identifies a burdensome rule. Use the rule already chosen; here we add costs, benefits and a stopping point aligned with the goal, without repeating the initial assessment.

A fictional example for discussion

Fictional example: Noa spends an hour designing a family message. She decides it should contain the necessary information and be readable; extra colors are a choice, not a condition for sending it.

> Draft for administrator review. Clinical review and final rights approval are still pending.

Mindful Path

Working together with the worksheet

2 | A conversation about one situation

Opening

Choose a situation the person wants to explore. It need not be the hardest situation. Check that the question is understood and the wording fits the person; their account comes before the therapist's interpretation.

1 | Question for discussion

What standard am I exploring, and in what context?

2 | Question for discussion

What is the task's goal, and what are the binding requirements?

3 | Question for discussion

What benefits come from my extra effort?

4 | Question for discussion

What does it cost, and does it serve the goal?

5 | Question for discussion

What sign will help me recognize a sufficient level?

Closing

Summarize what became clearer and what remains open. Use the existing SES-S01 and SES-S02 for the session framework. There is no need to repeat an assessment or plan already recorded.

Possible difficulties

If requirements are unclear, pause and clarify with the appropriate person. If someone enjoys the effort without burdensome costs, there is no need to create a goal to reduce it.

Mindful Path

PERF-02 | Therapist only - all age groups

Adapting for four age groups

3 | Age is a starting point, not an assumption about ability

CH | Children, approximately ages 6 to 11

Choose a familiar, safe task. Ask an appropriate adult to clarify actual requirements; do not place the child between conflicting adult demands.

Offer one question at a time with little writing. Adult support must not replace the child's own voice.

TE | Adolescents, approximately ages 12 to 17

Distinguish school requirements from personal additions. High grades or aspirations are not problems in themselves.

Agree in advance what will be shared and with whom, and explain the privacy limits in this setting. Do not promise absolute confidentiality.

AD | Adults

Clarify professional authority, working conditions and workload distribution. Changing an organizational requirement may need coordination rather than an individual decision.

OA | Older adults

Respect enjoyment of precision and order. Explore costs as the person experiences them, without assuming age requires less effort.

Offer reading support, time, and conversation according to preference. Choose help from another person together with the participant, respecting their privacy.

> Each age version needs its own review. Approval of one version does not automatically approve the others.

Practice, review and next steps

4 | Shared choice and learning from the attempt

Before offering practice sheet P

Choose one specific opportunity together, only if it suits the person. Clarify binding requirements and what cannot change. The idea can be explored through conversation alone. Do not set a quota for mistakes, compromise safety or require proof of personal worth.

At the next session

Compare with the chosen goal and costs, not others' performance. Clarify vague definitions of "sufficient" without turning them into another demand for perfection.

Professional and technical records

Each version has a separate review record covering age suitability, originality, rights, and fictional filling. Reviewer and date fields remain blank until assigned. File checks or a code merge are not clinical approval. Clinical information stays only in the authorized setting, outside the code repository.

Background references

The following links were used for background only. Questions and adaptations were written afresh for the expansion plan; no questionnaire, scale, or protocol was copied. Adult sources do not validate the child versions. This material makes no claim about session count or treatment effectiveness.
