MEANING-02 | Therapist only - all age groups

Values and expectations

1 | Purpose, fit and boundaries

Purpose of this unit

Distinguish a personally chosen direction, an achievable goal, and others' expectations. The outcome is one direction in the participant's words, without choosing values for them or measuring their worth by achievement.

Choice and adaptation

Choose this sheet following professional assessment and with consent. The person may skip questions, answer aloud, or choose another tool. This is proposed original material for review; it provides no score, diagnosis, or promise of an outcome.

Boundaries specific to this unit

Do not impose a worldview, faith, obedience, or meaning on suffering. A chosen value does not justify harm, sacrificing safety, or neglecting a basic need. This track is not a full ACT program or a substitute for individual assessment.

Reusing existing material

MEANING-01 identifies something important and a resource. Here, distinguish direction from expectation and outcome; SELF-02 addresses demands tied to self-worth and is different from exploring values.

A fictional example for discussion

Fictional example: Noa discovers that her goal of obtaining a particular role connects to wanting to learn and contribute. She can explore other ways to express that direction even if the role is unavailable.

> Draft for administrator review. Clinical review and final rights approval are still pending.

Mindful Path

MEANING-02 | Therapist only - all age groups

Working together with the worksheet

2 | A conversation about one situation

Opening

Choose a situation the person wants to explore. It need not be the hardest situation. Check that the question is understood and the wording fits the person; their account comes before the therapist's interpretation.

1 | Question for discussion

What value would I like to express in my chosen context?

2 | Question for discussion

What goal might serve it without defining my worth?

3 | Question for discussion

What outside expectations influence the choice?

4 | Question for discussion

What suits me even if others do not approve?

5 | Question for discussion

What needs clarification before a practical step?

Closing

Summarize what became clearer and what remains open. Use the existing SES-S01 and SES-S02 for the session framework. There is no need to repeat an assessment or plan already recorded.

Possible difficulties

If the participant seeks the right answer, return to a small example and their own words. Values are not a list of duties or a new route to self-criticism.

Mindful Path

MEANING-02 | Therapist only - all age groups

Adapting for four age groups

3 | Age is a starting point, not an assumption about ability

CH | Children, approximately ages 6 to 11

Use everyday examples and choices between actions, not a list of desirable traits. The adult does not grade the value the child chooses.

Offer one question at a time with little writing. Adult support must not replace the child's own voice.

TE | Adolescents, approximately ages 12 to 17

Allow choices different from family and friends while exploring practical boundaries. Do not require public declarations of identity or faith.

Agree in advance what will be shared and with whom, and explain the privacy limits in this setting. Do not promise absolute confidentiality.

AD | Adults

Explore direction within real commitments. Distinguishing it from expectations does not require changing a relationship or making a major decision; tensions between wishes can remain.

OA | Older adults

Respect longstanding values and changes in them. Do not set goals by age or assume meaning must come from family, giving, or faith.

Offer reading support, time, and conversation according to preference. Choose help from another person together with the participant, respecting their privacy.

> Each age version needs its own review. Approval of one version does not automatically approve the others.

Mindful Path

MEANING-02 | Therapist only - all age groups

Practice, review and next steps

4 | Shared choice and learning from the attempt

Before offering practice sheet P

One situation can be noticed and what matters in it explored without committing to change. A declaration, family decision, or between-session action is not required.

At the next session

Check whether exploration expanded choice rather than created another duty. Uncertainty about a value can remain open for further discussion.

Professional and technical records

Each version has a separate review record covering age suitability, originality, rights, and fictional filling. Reviewer and date fields remain blank until assigned. File checks or a code merge are not clinical approval. Clinical information stays only in the authorized setting, outside the code repository.

Background references

The following links were used for background only. Questions and adaptations were written afresh for the expansion plan; no questionnaire, scale, or protocol was copied. Adult sources do not validate the child versions. This material makes no claim about session count or treatment effectiveness.
