Practice between sessions | Adolescents, approximately ages 12 to 17

Noticing one moment during the week

Together we will choose an everyday moment and a recording method that suits me. We will plan before practice and describe it afterward.

Client code _____ Date _____ Session number _____

01 Planning: What will I notice, and how will I remember?

A chosen everyday context, a convenient recording time and a scope agreed with the therapist.

02 What happened at that moment?

What could be seen or heard? Identifying details may be left out.

03 What thought or image came up?

How did I interpret the situation? If I cannot remember, I will note that rather than force an answer.

04 What did I feel, and what did I notice in my body?

I can describe it in words; several feelings can occur together.

05 How did I respond, and what followed?

What did I do or avoid doing, and what was the immediate and later effect?

06 What helped, and what would I like to bring to the conversation?

A question, something learned or a difficulty with practice. A partial record can also support discussion.
