CORE-07 | In-session worksheet | Teenagers, approximately 12–17

Planning to explore one expectation

With the therapist, we will choose a suitable activity and a question to learn about. The goal is not to prove me wrong.

Client code _____ Date _____ Session number _____

01 What do I expect to happen?

We will state a specific expectation that can be linked to what we observe.

02 What did we choose to do to learn?

A specific action at a scope and under conditions agreed together.

03 What information do we want to collect?

What could we notice if the expectation comes true, does not or remains unclear?

04 When, where and with what support?

Preparation, roles, privacy or others' consent if relevant.

05 What are the boundaries and how will we change or stop?

What will we not do, and what if conditions or my wishes change?

06 How and when will we review learning?

Brief notes and a time to talk again, even if I do not attempt the activity.

Mindful Path
