Exploring a barrier before adapting the plan

Draft for review. Record only follow-up adapted with a therapist; this sheet sets no exercise or dosage.

Local client code _____ Date _____ Session number _____

01 What barrier was observed within agreed follow-up?

02 What is known about the response's function and what remains a hypothesis?

03 Did another way of obtaining the same reassurance or certainty appear?

04 What need or value requires separate exploration?

05 What adaptation needs a clinical decision before continuing?
