OCDYC-07 | OCDYC | Child aged 6–7 and a suitable support person

Ages 6–7: coordination between home and another setting

1 | Purpose, fit and boundaries

Purpose of this unit

Hear what differs for the child across environments and plan limited sharing with the therapist according to need, consent and safeguarding duties.

Choice and adaptation

Choose this sheet following professional assessment and with consent. The person may skip questions, answer aloud, or choose another tool. This is proposed original material for review; it provides no score, diagnosis, or promise of an outcome.

Boundaries specific to this unit

Do not automatically share thought content, diagnosis or a personal sheet. Do not assign staff exposure work or response changes without professional coordination. A new environment is not a copy of home.

Reusing existing material

OCDYC is separate from ages 8 and over. Shortening an adult form does not establish suitability. Earlier OCDYC learning may help, but unit 7 does not prescribe a session number.

A fictional example for discussion

Fictional example: Eitan finds asking for help at kindergarten difficult. His supporter asks the therapist about a brief message for staff. The therapist checks what needs sharing and with whom, without sending the entire sheet.

> Draft for administrator review. Clinical review and final rights approval are still pending.

Mindful Path

OCDYC-07 | OCDYC | Child aged 6–7 and a suitable support person

Working together with the worksheet

2 | A conversation about one situation

Opening

The therapist or support person reads one question. The child may use a few words, point or skip. Adults may write the child's words but not answer for them. Professional terms and descriptions of every thought are not required.

1 | Question for discussion

Where would I like things to be easier?

2 | Question for discussion

What is different there from home?

3 | Question for discussion

Which adult there feels comfortable to approach?

4 | Question for discussion

What would I like them to know to help?

5 | Question for discussion

What do I want to ask before we speak with them?

Closing

Summarize what became clearer and what remains open. Use the existing SES-S01 and SES-S02 for the session framework. There is no need to repeat an assessment or plan already recorded.

Possible difficulties

If the setting cannot provide agreed support, update the plan with the therapist. Do not blame the child or expect them to relay adult instructions.

Mindful Path

OCDYC-07 | OCDYC | Child aged 6–7 and a suitable support person

Child, support person and therapist — separate roles

3 | Ages 6–7 only; developmental and family adaptation required

The voice of the child aged 6–7

Ask a simple preference without promising complete control over safeguarding disclosures. Briefly explain the limits.

The parent or support person's role

Adults are responsible for coordination. Share only necessary, agreed information, without names or identifying details in content repositories.

The therapist's role and adapting the setting

Explore consent, setting needs and access. Sharing with staff does not authorize independent ERP guidance or expanding the plan without assessment.

Limits of the material

Mapping against a full OCD manual and professional approval remain pending. This is original support material for review, not an approved ERP manual or its replacement.

> Do not apply this pathway to other age groups without separate review.

Mindful Path

Practice, review and next steps

4 | Shared choice and learning from the attempt

Before offering practice sheet P

The P sheet is shared: two questions for the child's voice and three for supporter observations. Use only as agreed with the therapist, without child-alone exposure homework, abrupt response changes or punishment. Daily records and thought counts are unnecessary.

At the next session

Check that sharing was limited and understood and support fits each environment. Do not extend treatment changes to another setting without an adapted decision.

Professional and technical records

Each version has a separate review record covering age suitability, originality, rights, and fictional filling. Reviewer and date fields remain blank until assigned. File checks or a code merge are not clinical approval. Clinical information stays only in the authorized setting, outside the code repository.

Background references

The following links were used for background only. Questions and adaptations were written afresh for the expansion plan; no questionnaire, scale, or protocol was copied. Adult sources do not validate the child versions. This material makes no claim about session count or treatment effectiveness.

Treatment-manual mapping status

Mapping against a full OCD manual and professional approval remain pending. This is original support material for review, not an approved ERP manual or its replacement.
