Adolescents, approximately ages 12 to 17

My starting point

We will choose a personal sign of progress and define how to check it in the same way later.

Client code _____ Date _____ Session number _____

> This is personal tracking, without a diagnostic score. The information supports discussion and choosing the next adaptations.

01 What do I want to work toward, and why does it matter to me?

An area or goal I chose; the goals sheet may help.

02 What is happening now, and what period are we looking at?

An example of action or participation; we will note the period and conditions.

03 What sign of change will we notice?

What can we see or describe? If we count, we will define what counts as an attempt.

04 How will I record it in a way that suits me?

A word, mark or short description; daily tracking is not required unless agreed.

05 When will we review it, and what could affect the comparison?

An agreed date, support, opportunities and changed circumstances we want to remember.

Mindful Path
