Practice between sessions | Adults

Recording an everyday moment to learn from

We will plan to record one situation together. The aim is to notice what happened and possible links between its parts.

Client code _____ Date _____ Session number _____

01 Planning together before practice

What context will I observe, when will I record it, and on what scale? A pleasant or neutral situation is also an option.

02 The event and context

What happened, when and where? An observable description, separate from interpretation.

03 The thought or meaning

Words, an image or interpretation that arose; distinguish recollection from a later hypothesis.

04 The feeling and body sensations

What did I feel and notice in my body? Describe intensity in words if helpful.

05 The response and outcome

What did I do or not do, and what were the immediate and later effects?

06 Learning for the meeting

What helped, what is unclear, and what would I like to explore? If I did not record anything, what made it hard?
