Practice between sessions | Adolescents, approximately ages 12 to 17

Recording an interpretation and keeping a question open

Together we will choose one context and a manageable amount of practice. We will describe what happened without forcing a pattern.

Client code _____ Date _____ Session number _____

01 Plan: what will I notice and how will I record it?

An everyday moment, a recording method and an agreed time.

02 What actually happened?

What did I see or hear, and in what context?

03 What went through my mind?

A sentence or picture; if recalled later, I will say when it is a guess.

04 What is known and what is my interpretation?

Some parts can stay unclear. Does anything resemble an earlier example, and what differs?

05 How did I feel and respond?

What was the effect, and what else in that situation influenced me?

06 What would I like to explore next time?

An open question or something that made recording difficult, even if the record is incomplete.

Mindful Path
