Practice between sessions | Adults

Planning a helpful response and learning from experience

We will connect the session's exploration to a small everyday attempt, at a scope chosen together.

Client code _____ Date _____ Session number _____

01 The expected situation and conditions

In what context, when and how much? What support or adjustment is needed?

02 The familiar interpretation and chosen wording

What might arise, and what do I want to remember about the information and uncertainty?

03 The planned practical response

What will I do, request or arrange? What can be reduced or changed if unsuitable?

04 Description after trying

What was done and what followed? If not attempted, what barriers arose?

05 Learning about the response and situation

What helped, what did not and what needs adjusting? The feeling may remain after a useful step.

06 Further exploration in the session

What question, result or adjustment would I like to bring to our next conversation?

Mindful Path
