OCDYC-08 | OCDYC | Child aged 6–7 and a suitable support person

Ages 6–7: what remains and who will help next

1 | Purpose, fit and boundaries

Purpose of this unit

Summarize with child and supporters what became possible, changes warranting contact and follow-up agreed with the therapist.

Choice and adaptation

Choose this sheet following professional assessment and with consent. The person may skip questions, answer aloud, or choose another tool. This is proposed original material for review; it provides no score, diagnosis, or promise of an outcome.

Boundaries specific to this unit

There is no promise that difficulty will not return and no need for constant checking. Functional, health or environmental changes need suitable assessment. Do not independently restart tasks or change medication based on the sheet.

Reusing existing material

OCDYC is separate from ages 8 and over. Shortening an adult form does not establish suitability. Earlier OCDYC learning may help, but unit 8 does not prescribe a session number.

A fictional example for discussion

Fictional example: Ruthie says she plays with a friend again. Her father describes a new morning-routine change. The therapist explores and updates contact arrangements without portraying difficulty as failure.

> Draft for administrator review. Clinical review and final rights approval are still pending.

Mindful Path

OCDYC-08 | OCDYC | Child aged 6–7 and a suitable support person

Working together with the worksheet

2 | A conversation about one situation

Opening

The therapist or support person reads one question. The child may use a few words, point or skip. Adults may write the child's words but not answer for them. Professional terms and descriptions of every thought are not required.

1 | Question for discussion

What thing I enjoy became easier?

2 | Question for discussion

What did I learn about asking for help?

3 | Question for discussion

Who can help if it gets hard again?

4 | Question for discussion

What do I want adults to remember about me?

5 | Question for discussion

What would I like to ask next session?

Closing

Summarize what became clearer and what remains open. Use the existing SES-S01 and SES-S02 for the session framework. There is no need to repeat an assessment or plan already recorded.

Possible difficulties

Ending or changing settings may raise questions. Give a brief explanation and clear contact route without promising unavailable access. Do not turn a sign list into monitoring every thought.

Mindful Path

OCDYC-08 | OCDYC | Child aged 6–7 and a suitable support person

Child, support person and therapist — separate roles

3 | Ages 6–7 only; developmental and family adaptation required

The voice of the child aged 6–7

Use an example from play, relationships or routine. Do not make the child identify recurrence signs or manage follow-up alone.

The parent or support person's role

Notice meaningful functional change without repeated questioning. Maintain an agreed contact route and report changed conditions.

The therapist's role and adapting the setting

Agree on follow-up and referral as needed. Complete manual mapping, clinical and rights reviews before changing draft status.

Limits of the material

Mapping against a full OCD manual and professional approval remain pending. This is original support material for review, not an approved ERP manual or its replacement.

> Do not apply this pathway to other age groups without separate review.

Mindful Path

Practice, review and next steps

4 | Shared choice and learning from the attempt

Before offering practice sheet P

The P sheet is shared: two questions for the child's voice and three for supporter observations. Use only as agreed with the therapist, without child-alone exposure homework, abrupt response changes or punishment. Daily records and thought counts are unnecessary.

At the next session

Review functioning and relationships over time under the agreed plan. Form count does not determine treatment ending; new needs justify reassessment.

Professional and technical records

Each version has a separate review record covering age suitability, originality, rights, and fictional filling. Reviewer and date fields remain blank until assigned. File checks or a code merge are not clinical approval. Clinical information stays only in the authorized setting, outside the code repository.

Background references

The following links were used for background only. Questions and adaptations were written afresh for the expansion plan; no questionnaire, scale, or protocol was copied. Adult sources do not validate the child versions. This material makes no claim about session count or treatment effectiveness.

Treatment-manual mapping status

Mapping against a full OCD manual and professional approval remain pending. This is original support material for review, not an approved ERP manual or its replacement.
